September 25, 2018

DCI Project #	6647815
Intake Date	10.02.2018
Project Address	3138 Wetmore Ave S
Owner	Green Canopy Homes
Unit(s) Type	TH – 6
Unit Floor Area	1120SF – 1330SF
Built Green Credits	466
Built Green Multiplier	1.1

The proposed project, referenced above, will meet the green building standard by earning at least a 4-Star Built Green certification from the Master Builders Association of King and Snohomish Counties. The proposed building(s) is estimated to achieve an annual energy use of at least 15 percent lower than the standard reference design calculated in the 2015 Seattle Energy Code.

As a Built Green and NW Energy Star 3rd Party Verifier, Evergreen Certified, LLC. will inspect the project at foundation, air sealing, insulation, and finish stages. We will confirm all needed points and credits claimed by the builder on the attached preliminary Built Green checklist. EC will also perform required blower door test(s) to confirm whole house air leakage, combustion safety, and ventilation fan flow as required for the points assigned.

If you have any questions or suggestions, please call or e-mail me anytime.

Thank you,

Tadashi Shiga, Principal
C: 206-491-7111
