The above project insurance was reviewed and approved for McKee Enterprises, LLC (Excavation) and Kulchin Foundation Drilling Co (Shoring). Please note the insurance documents we currently hold for McKee Enterprises, LLC will expire 6/7/2020 and the insurance documents we currently hold for Kulchin Foundation Drilling Co will expire 6/16/2020. Insurance should remain in effect throughout the permit period; please provide a renewal Certificate of Insurance for work completed after the expiration date.

Note: It is understood that if the above contractor(s) is replaced, for whatever reason, it is the owner or general contractor's responsibility to contact SDCI/Risk management so the insurance for the new contractor can be approved prior to beginning the above associated construction. Otherwise, the project is out of compliance with provisions of the Grading Code, and the owner's risk is needlessly increased. The Seattle Department of Construction and Inspection (SDCI) could issue a Stop Work Order if an excavation and or shoring contractor is used without having their insurance approved by FAS/Risk Management.

Thank you,

Amber
