

RAT ABATEMENT DECLARATION FOR DEMOLITION PROJECTS

For compliance with Seattle Building Code 3303.15 and Seattle Residential Code R107.12

Demolition Permit No. 6789648-DM

Address of Building to be Demolished: 6416 15th Ave NW

I understand the following requirements apply to my demolition permit.

1. Rat abatement must **begin at least 15 days before** first ground inspection and the start of demolition or the start of any clearing and grading activity.
2. Rat abatement **must continue** until the start of demolition.
3. My project must pass the first ground disturbance inspection before I start demolition or clearing and grading on my site.
4. I must give the site inspector a **fully executed Rat Abatement Certification (RAC)** signed by a licensed pest control agent **at the first ground disturbance inspection**.
5. In addition to the RAC, bait stations or other evidence of an ongoing rat abatement program should be easily visible at the first ground inspection.
6. Site inspectors cannot waive the rat abatement requirement.

Re: Rodent Abatement

To whom it may concern:

The following address is in the process of a rodent abatement program. Rodent bait stations are presently on site and have been monitored weekly since installed. Rodent activity has decreased to less than 20% over at least fourteen days; however the stations will remain on site until demolition has begun.

Address: 6416 15th Avenue Northwest
SEATTLE, WA 98107

Regards,

Sunrise Pest Management
